

Controls and compliance checklist

To complete the controls assessment checklist, refer to the information provided in the [scope, goals, and risk assessment report](#). For more details about each control, including the type and purpose, refer to the [control categories](#) document.

Then, select “yes” or “no” to answer the question: *Does Botium Toys currently have this control in place?*

Controls assessment checklist

Yes	No	Control
☐	☒	Least Privilege
☐	☒	Disaster recovery plans
☐	☒	Password policies
☐	☒	Separation of duties
☒	☐	Firewall
☐	☒	Intrusion detection system (IDS)
☐	☒	Backups
☒	☐	Antivirus software
☒	☐	Manual monitoring, maintenance, and intervention for legacy systems
☐	☒	Encryption
☐	☒	Password management system
☒	☐	Locks (offices, storefront, warehouse)
☒	☐	Closed-circuit television (CCTV) surveillance

- ☒ ☐ Fire detection/prevention (fire alarm, sprinkler system, etc.)
-

Then, select “yes” or “no” to answer the question: *Does Botium Toys currently adhere to this compliance best practice?*

Compliance checklist

Payment Card Industry Data Security Standard (PCI DSS)

Yes	No	Best practice
☐	☒	Only authorized users have access to customers’ credit card information.
☐	☒	Credit card information is stored, accepted, processed, and transmitted internally, in a secure environment.
☐	☒	Implement data encryption procedures to better secure credit card transaction touchpoints and data.
☐	☒	Adopt secure password management policies.

General Data Protection Regulation (GDPR)

Yes	No	Best practice
☐	☒	E.U. customers’ data is kept private/secured.
☒	☐	There is a plan in place to notify E.U. customers within 72 hours if their data is compromised/there is a breach.
☐	☒	Ensure data is properly classified and inventoried.
☒	☐	Enforce privacy policies, procedures, and processes to properly document and maintain data.

System and Organizations Controls (SOC type 1, SOC type 2)

Yes	No	Best practice
☐	☒	User access policies are established.
☐	☒	Sensitive data (PII/SPII) is confidential/private.
☐	☒	Data integrity ensures the data is consistent, complete, accurate, and has been validated.
☐	☒	Data is available to individuals authorized to access it.

This section is *optional* and can be used to provide a summary of recommendations to the IT manager regarding which controls and/or compliance best practices Botium Toys needs to implement, based on the risk posed if not implemented in a timely manner.

Recommendations (optional): In this section, provide recommendations, related to controls and/or compliance needs, that your IT manager could communicate to stakeholders to reduce risks to assets and improve Botium Toys' security posture.

Points I recommend based on my study:

- Conduct regular Security Awareness Training with all employees, covering social engineering techniques such as phishing, vishing, and pretexting, in order to reduce the risk of human-based attack vectors that could lead to unauthorized access or data breaches.
- Enforce a Least Privilege Access policy across all internal systems. Currently, employees have unrestricted access to the internal database, which represents a critical exposure. Each user account must be limited to the data and operations strictly required for their role.
- Implement a SIEM (Security Information and Event Management) solution to enable the IT team to centralize, correlate, and analyze logs and security events in real time, improving detection and response capabilities against both internal and external threats.

- Establish and enforce a Strong Password Policy for all employee and customer accounts, requiring minimum length, complexity, and rotation periods. This mitigates risks associated with brute-force attacks and the use of predictable credentials.
- Additional recommendations are available and can be provided upon request following a more comprehensive assessment of the environment.

I could say a lot of more recommendation, but I'm tired and I need to go to work lol
